Personal Profile

I'm a Full Stack developer constantly exploring new technologies. My desire to grow professionally constantly pushes me to study and approach many fields, but my main focus is on the Back End world.

Experience

Vittoria RMS

Full Stack Developer

Pianella, IT
Jan 2023 - Current

- Using C# for software maintenance and updating
- Using Angular for Implementation and updating of interfaces in management
- Bug Fixing

Projects

Starvato Airlines

[Demo Airplane booking site](#) 

2022
one month

Technologies used: Python, Django, PostgreSQL, Bootstrap 5, Javascript, HTML, CSS

Description: This is an airline booking website built using the Django framework. It is possible to choose your own seat and get an email when the ticket is booked

PipeNetwork

[Demo CRM system admin-side](#) 

2023
one month

Technologies used: React, Material UI, ASP.NET, Spring Boot, PostgreSQL, JWT Token

Description: This is an administration panel for a CRM system, where you can manage clients and leads.

RTLS Wizards

[Real Time Locating Tracking System for Industrial use](#) 

2023
three months
Built in Team

Technologies used: React, Chakra UI, Azure Functions, Cosmos DB, Leaflet JS

Description: This project is a simulation of an Indoor Tracking System (ITS) using Redux, MongoDB, and Spring technologies. The project was built in collaboration with a team of professionals.

Other minus projects are visible in my [Portfolio](#)  or in on my [GitHub](#)
