About Me

I started programming in 2021 with the basics of the Front End, then I attended a two-year training course and realized that I deeply loved the Back End side. During the two years, I studied and made projects with the most varied technologies, working also on the Cloud and Internet of Things. I currently work as a Full Stack Developer. My passion is studying and keeping up with modern technologies learning something new every day. I am currently looking for a company to grow and develop with.

Work Experience

VittoriaRMS

Pescara, Italy

FULL STACK DEVELOPER

Jun. 2023 - Present

VittoriaRMS is a **Risk Management software** owned by the company Si&T.

Technologies: C-Sharp, .NET, Angular, Typescript, Bootstrap, SQL Server, Team Foundation Server.

- **Customer Developments:** I collaborated with my team leader and project manager to create new features commissioned by the customers for the application, having also to face deadlines.
- **Technical reviews:** Performed technical reviews for my colleagues.
- **Architectural rewrites:** I collaborated with the architectural team to eliminate old technologies and packages and replace them with more modern ones.

Personal goals: I am happy I participated in the transition of the software from Bootstrap 3 to 5 version, learning to deal with all types of people in the working environment.

Side-projects

RTLS Wizards

REAL-TIME TRACKING SYSTEM FOR INDUSTRIAL USE, BUILT-IN TEAMS, AND USING THE CLOUD.

March 2023 - July 2023

Technologies: Azure Functions, C-Sharp, JWT, Azure Cosmos DB, Arduino, React, Redux, Typescript, Chackra UI.

The project was created in collaboration with the company Aptar SPA, together with a team of people we competed to create the best project for Industry 4.0.

- Built the project together with a team of 4 people, where I and a second collaborator led the main solutions.
- Created a tracking system using Arduino ESP 32 UWB as Anchors search for signals and tags to find.
- Created a series of nodes communicating with each other using the Ultra Wide Band network.
- Implemented Cloud features such as Azure Functions and Azure CosmosDB respectively for the advantage of using high availability and server-less functions.

Pipenetwork

CUSTOMER RELATIONSHIP MANAGEMENT PANEL ON THE ADMINISTRATION SIDE.

Dec. 2022 - Jan. 2023

Technologies: C-Sharp, ASP.NET Web Api, Java, SpringBoot, JWT, Postgres, React, Typescript, Material UI, Chackra UI.

- Created an authentication and authorization system using Java Spring Boot with JWT token, and then implemented it also in ASP. NET Web API.
- Created a contacts panel where you can add, edit and delete people.
- Created a Dashboard with graphs and widgets to show all the most important information relating to the CRM.

Starvato Airlines

AIRLINE TICKET BOOKING SITE.

March 2022 - Apr. 2022

Technologies: Python, Django, HTML, CSS, Javascript.

- Created a ticket registration system that allows you to reserve one or more seats for the desired flight.
- Implemented text search to filter flights based on user-entered filters.
- Used the Mailchimp service to send the airline ticket booking code to users via Mail.

Certifications and Languages

Microsoft:
AZ 900 Fundamentals

Certiport:
Javascript IT Specialist

Knowledge Pillars:
Python Coding Specialist

Certiport:
Java IT Specialist

Languages: Italian: Native English: B1 TRINITY (Currently attending a training course to improve my english level.)

Education

Infobasic(Software Development Bootcamp)

Pescara, Italy

Oct. 2022 - July. 2023

- I started my journey as a developer, where I learned the fundamentals of both Front End and Back End programming.
- Obtained a merit scholarship in the year 2022 guaranteed by a collaboration between Infobasic and SI&t which allowed me to work for the same company.

Liceo Polivalente E. Pestalozzi (Plastic-Pictorial Path)

San Severo, Italy

ARTISTIC HIGH SCHOOL DEGREE

Sept. 2016 - Aug. 2022

- Grade: 90

Skills

Hard Skills

- **Languages and Frameworks:** C-Sharp, .NET, Typescript, NodeJS, Javascript, Java, Springboot, Azure Functions, Angular, React, Redux, ASP.NET, HTML, CSS.
- **Databases:** SQL, PostgreSQL, SQL Server, MongoDB, Azure CosmosDB.
- **Other:** Azure Cloud Services, Git, Team Foundation Server (TFS), Linux, BootStrap, Chakra UI, Material UI.

Soft Skills

- I have a great ability to adapting to work with both modern and older technologies, with the ability to best update the older ones.
- I learned to work in a team, encouraging dialogue and teamwork both between professionals and beginners, collaborating and occasionally helping my colleagues when they needed it, along to maintain always a friendly and healthy environment.
- I am trained to respect the deadlines and to make decisions even under pressure in a short time, because of commissioned projects during my work experiences.

Hobbies

- I am a dynamic person who likes to travel abroad, with a backpack on my shoulders, without too many demands, from time to time I also like to go trekking and excursioning in the mountains or forest.
- My work is also my passion, technology has always fascinated me which is why I try to keep up to with the latest updates on how these new technology work and their practical and theoretical developments. I like to participate in conferences and communities throughout Italy, examples are Codemotion and GDG (Google Developer Group).
